

Idea: multi-storey fields

At the first stage, we will need a team of specialists who will figure out how to build a structure in which curly cucumbers grow in layers, using many mirrors to use sunlight to save energy.

Idea formation	
Time	2 months
Money	20 000 lv
Workers	8 optical physicists, 2 architects, 1 agronomist

Scheme develop	
Time	2 months
Money	11 000 lv
Workers	1 architect, 8 optics physicists, 1 constructor

Design develop	
Time	2,5 months
Money	11 700 lv
Workers	1 architect, 2 designers

Prototype	
Time	1.5 months
Money	8 000 lv
Workers	5 constructors
Materials	building materials, mirrors

At the construction stage, you need to accurately calculate the materials, order them and build the fields.

Ordering	
Time	1 month
Money	60 000 lv
Workers	1 analyst, 1 engineer

Building	
Time	1.5 months
Money	30 000 lv
Workers	45 builders, 1 engineer
Materials	purchased construction materials, tools, 1 crane

The last stage includes planting, grooming and collecting curly cucumbers.

Plant	
Time	10 days
Money	10 000 lv
Workers	15 farmers
Materials	cucumber seeds - 2T, instruments

Caretaking	
Time	4 months
Money	10 000 lv
Workers	1 controller
Materials	automatic irrigation systems, fertilization

Collect	
Time	10 days
Money	5000 lv
Workers	15 farmers
Materials	baskets
